

The Enterprise Formatting Engine

M-PReS Production is a formatting and production engine from PrintSoft designed to extend the power and flexibility of PReS.

The “M” in M-PReS stands for “multi-platform” because M-PReS Production allows PDC files (compiled job files created by PReS) to be run on both Windows and high-end Unix servers. Not only that but as a single, intuitive print control, M-PReS Production can produce any supported output format from the PDC using a range of powerful data streaming options.

This means that jobs developed for one data stream can be converted to another without any changes being required in the script. All data stream output is based on the same internal

format meaning greater consistency across jobs.

Flexible and innovative with powerful debugging and preview options, M-PReS Production provides full control over the generation of spool files for printing and archiving. Combining ease of use with performance and reliability, it can be integrated into any PDC workflow environment.

A cross platform solution that supports a variety of input and output formats, M-PReS Production is a powerful addition to the PReS range of products bringing greater flexibility to the production of quality personalised documents.

Features

- **Data Input**
Fixed length, ASCII delimited and CR/LF delimited records (with fixed length fields) are currently supported. Also dBase, Access or Excel files.
- **Graphics Supported**
PCX, JPEG, IPI, BMP, TIFF
- **Output**
AFPDS, PCL, PDF, VDX, PS, IPDS
- **Operating System**
Linux (Red Hat, SuSE, Fedora Core, Debian, Mandrake etc.), IBM AIX 4.3.3, HP-UX 11i, Sun Solaris 9, Windows 2000 and XP

Benefits

- **Multi platform**
- **Single print control**
- **PDC to any supported data stream**
- **Preview while you print**
- **Single or continuous printing**
- **Printing from a specific record**
- **Extensive debugging facilities**
- **Variable monitoring and testing**
- **Powerful data stream options**
- **PDS compiler**
- **More flexible document management**
- **Increased efficiency and productivity**
- **Reduced lead times**

PrintSoft

AN OBJECTIF LUNE COMPANY

About PrintSoft

PrintSoft is globally recognised as the pioneer of variable data composition technology for high speed printing.

PrintSoft provides software solutions for creating highly personalised, dynamic documents for transactional, direct-mail, white mail and transpromotional applications.

PrintSoft has the largest installed base of service bureaux clients in the world. With installations in over 50 countries, PrintSoft offers its customers unparalleled breadth and depth of expertise.

PrintSoft can provide a customised solution that suits your ongoing needs, enabling you to effectively communicate with your customers.
